Summary

Python Backend Developer (Fresher) with hands-on experience building REST APIs, scalable backend systems, and AI-integrated applications using Flask and PostgreSQL. Developed a real-time chatbot with database integration and strong focus on performance and clean architecture.

Skills

Programming: Python, JavaScript, C++

Web Technologies: HTML, CSS

Databases: PostgreSQL, MySQL, SQL Server

Tools: Git, GitHub, VS Code, Postman

Concepts: Data Structures & Algorithms, OOP, REST APIs, API Integration

Education

Master of Computer Science Sri Balaji University, Pune	2023 – 2025 CGPA: 7.43
B.Sc. (Statistics, Mathematics, Computer Science) Shri Shivaji Science College, Nagpur	2019 – 2022 73.96%

Work Experience

Data Analyst Intern — Eliora Technology Pvt. Ltd. Nagpur
Dec 2024 – May 2025

- Analyzed **50,000+ records** using Python (Pandas) and SQL to generate actionable insights.
- Automated reporting workflows, reducing manual effort by **25%**.
- Built data validation scripts to improve accuracy and consistency.
- Contributed to backend data processing and ETL pipeline structure.

Projects

AI Chatbot with Database Integration GitHub

- Developed a real-time AI chatbot using Flask handling concurrent users with low latency.
- Built RESTful APIs and integrated external AI API for dynamic, context-aware responses.
- Designed PostgreSQL database for persistent chat storage (messages, sessions, timestamps).
- Optimized backend logic for performance and scalability.

School Fees Management System GitHub

- Developed a web application managing fee data for **100+ students**.
- Implemented CRUD operations and relational database schema.
- Automated fee tracking, reducing manual work by **40%**.

Certifications

Python, SQL, C++, Data Analytics Internship — Eliora Technology
